

## Shareholders of Molecular Partners approved the elections of Bill Burns and Patrick Amstutz to the Board of Directors

October 31, 2017

**Zurich-Schlieren, October 31, 2017.** At today's Extraordinary General Meeting of Molecular Partners (SIX: MOLN), the shareholders of the company approved the election of William (Bill) Burns, former CEO of Roche Pharmaceuticals, and Patrick Amstutz, CEO of Molecular Partners, as new members of the Board of Directors with large majorities.

The Board of Directors has appointed Bill Burns Vice-Chairman and will nominate him for election as Chairman of the Board of Directors at the Annual General Meeting 2018.

Bill Burns brings to Molecular Partners vast experience in the development and commercialization of drugs, particularly in oncology, and extensive knowledge of pharmaceutical industry operations. He held various executive positions at Roche for 28 years, culminating in his nomination to the position of CEO of Roche Pharmaceuticals and board seats at Roche, Genentech and Chugai Pharmaceuticals. Since 2010, he has been a Senior Independent Non-Executive Director of Shire Pharmaceuticals plc, a post from which he will step down in April 2018. Bill Burns has also been Vice-Chairman of Mesoblast since 2016. Additionally, he is a Trustee of the Institute of Cancer Research in London, and a member of the Scientific Advisory Board of the Center for Integrated Oncology of the University of Cologne/Bonn.

Patrick Amstutz is a co-founder of Molecular Partners and has served as CBO and COO of the company before being appointed as CEO.

### About the DARPin® Difference

DARPin® therapeutics are a new class of protein therapeutics that open an extra dimension of multi-specificity and multi-functionality. DARPin® candidates are potent, specific, safe and very versatile. They can engage more than five targets at once, offering potential benefits over those provided by conventional monoclonal antibodies or other currently available protein therapeutics.

The DARPin® technology is a fast and cost-effective drug discovery engine, producing drug candidates with ideal properties for development and very high production yields. With their good safety profile, low immunogenicity and long half-life in the bloodstream and the eye, DARPin® therapies have the potential to advance modern medicine and significantly improve the treatment of serious diseases, including cancer and sight-threatening disorders. Molecular Partners is partnering with Allergan to advance clinical programs in ophthalmology, and is advancing a proprietary pipeline of DARPin® drug candidates in oncology. The most advanced global product candidate is abicipar, a molecule currently in phase 3, in partnership with Allergan. Several DARPin® molecules for various ophthalmic indications are also in development. The most advanced systemic DARPin® molecule, MP0250, is in a clinical POC study in multiple myeloma. In addition, Molecular Partners will evaluate MP0250 for the treatment of solid tumors in a phase 1b/2 trial in patients with epidermal growth factor receptor (EGFR)-mutated non-small cell lung cancer (NSCLC). MP0274, the company's second-most advanced DARPin® drug candidate in oncology, has entered into phase 1 clinical development. With its broad anti-HER activity, MP0274 inhibits HER1-, HER2- and HER3-mediated downstream signaling via Her2, leading to induction of apoptosis. Molecular Partners is also advancing a growing preclinical pipeline that features several immuno-oncological development programs. DARPin® is a registered trademark owned by Molecular Partners AG.

### About Molecular Partners AG

Molecular Partners AG is a clinical-stage biopharmaceutical company that is developing a new class of therapies known as DARPin® therapies. With a management team that includes many of the company's founding scientists, Molecular Partners continues to attract talented individuals who share a passion for developing breakthrough medicines for serious diseases. Molecular Partners has compounds in various stages of clinical and preclinical development and several more in the research stage, with a current focus on ophthalmology and oncology. The company establishes research and development partnerships with leading pharmaceutical companies and is backed by established biotech investors.
